SUNBRELLA® MARINE
THE NEW COLLECTION

The Imagine collection, offering 169 references, shakes up the traditional yachting codes and draws its inspiration from interior decor and the luxury sector. With a bold, striking design, this new Sunbrella® Marine collection features original options including denim, contemporary and chic jacquards and updated sailor stripes. Featuring 11 lines with superior technical performance, this collection of fabrics is now the widest and most attractive on the market.

ELEGANT PERFORMANCE

ELEGANT PERFORMANCE

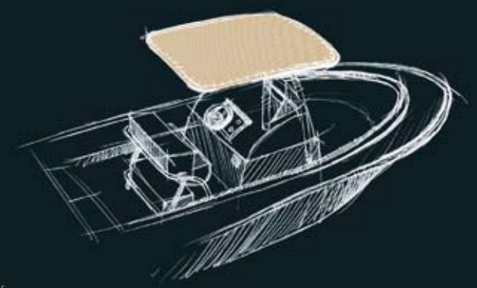
THE SUNBRELLA® MARINE IMAGINE COLLECTION INCLUDES 10 LINES OF PRODUCTS WITH SUPERIOR TECHNICAL PERFORMANCE AND HAS BECOME A GLOBAL STANDARD IN BOATING FABRICS. THE SUNBRELLA® SUPREME FABRIC IS NOW A MUST-HAVE THANKS TO ITS TECHNICAL EXPERTISE AND AESTHETIC APPEAL.

Sunbrella® Supreme
1. Charcoal with linen flock
2. Captain Navy with linen flock

Sunbrella® Furling
1. Natural
2. Dune
3. Marine blue



SUNBRELLA® FURLING

Sunbrella® Furling is designed to prevent UV rays from deteriorating Genoa jibs when wet. With its light weight, flexibility and resistance, Furling is specially designed for this application and does not alter the sail's performance. Sunbrella® also offers an adhesive and repositionable version using a next-generation glue which enables positioning and repositioning without damage to the sail. Furling and Furling Adhesive are particularly recommended for boats under 40'.

SUNBRELLA® SUPREME

The inner side of Sunbrella® Supreme features beige flocking with a velvety feel that contrasts with its outer side. The crew can thus enjoy optimal lighting and a cosy ambiance under the boat's awning. Combined with complete waterproofing, this innovative principle makes Sunbrella® Supreme the best solution for covers, bimini tops and flybridges.

ELEGANT PERFORMANCE

THE IMAGINE COLLECTION SETS OFF TOWARD PURPLE HORIZONS AND GREYED BLUE SHADES. ITS GEOMETRIC JACQUARDS BRIGHTEN UP THE LIVING SPACES OF YACHTS AND SAILBOATS. THESE NEW PATTERNS AND COLOURS ALLOW YOU TO CREATE DIFFERENT LOOKS ON BOARD YOUR CRAFT: CLASSIC, MODERN, CHIC OR SOPHISTICATED.

Sunbrella® line cushions

SUNBRELLA® - CUSHIONS

The new line of Sunbrella® cushion fabrics is specifically designed for the interior and exterior outfitting of boats, as well as for all decorative applications for motor boats and sailboats. Composed of 50 references of solids, stripes and jacquards, it offers endless combinations with all the Sunbrella® lines.

NAUTICAL CHIC

NAUTICAL CHIC

THE PALETTE OF COLOURS ON OFFER IN THE SUNBRELLA® LINE IS INSPIRED BY THE SANDY TONES OF COASTLINES, THE ORANGE SHADES OF SETTING SUNS, AND NAVY BLUES. THESE CONTEMPORARY SOLIDS STRUCTURE A COLLECTION OF 21 REFERENCES IN TRENDY COLOURS.

SUR LAST®

Woven from a coated solution-dyed polyester fibre, Sur Last fabric stands out for its flexibility and light weight, which facilitates folding and storage. Easy to maintain and perfectly suitable for winter covers, it resists water, ripping and abrasion. It is available in a width of 152.5 cm: perfect for boat tops.

5. Arctic blue

SUNBRELLA®

Sunbrella® fabric is designed for sailboat, winch and wheel tops. It is also recommended for bimini tops. Manufactured from solution-dyed acrylic fibres, Sunbrella® receives a fluorcarbonated treatment, which gives the canvas optimal resistance to stains, grease and water. Sunbrella® fabric features good breathability and is certified rot-proof. It offers high value-added protection for the boat and its crew. Sunbrella® has a 10-year warranty and offers a wide range of 21 references.

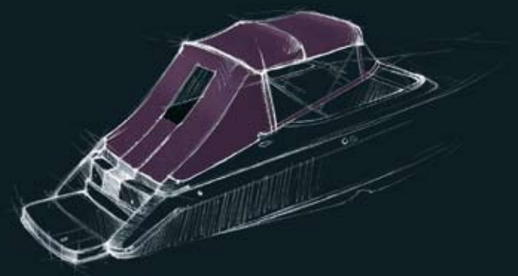
2. Taupe
3. Beige Chiné
4. Prussian Blue
5. Crimson Red
6. Apricot
7. Dark smoke
8. Midnight Blue

SUNBRELLA® PLUS

Imagine presents a particularly improved version of the Sunbrella® Plus line, which the R&D team worked on for five years and now offers a very high dimensional stability. Designed for tops/cabriolets and back closures, Sunbrella® Plus is the benchmark solution for protecting the boat and its crew under extreme conditions. Composed of a classic Sunbrella® Marine fabric, it is combined with an acrylic coating on one side. With 32 references, Sunbrella® Plus offers exceptional water resistance and guarantees high mould resistance thanks to an antifungal treatment specially formulated for use at sea.



SUNWORKER MARINE

Designed to meet new sun protection needs, Sunworker Marine combines transparency, resistance and fineness with visual appeal and thermal comfort. It is manufactured on a Rachel Trameur base and has excellent mechanical resistance. Its regular grain and micro-perforation ensure a transparency that filters sunlight and heat.

Sunbrella® - Cushions Portofino
1. Taupe

THE MARINE LINE

THE MARINE LINE

THE COLLECTION OF CUSHION FABRICS REVISITS THE SAILOR STRIPE AND WEAVES A NEW DESIGN FOR OUTFITTING SAILBOATS AND YACHTS. PLACED ALONGSIDE ORANGE, VARIOUS SHADES OF BLUE REVEAL A NEW BRILLIANCE. IN A SUBTLE FUSION WITH GREYS, THEY TRACE A PATTERN REMINISCENT OF HAUTE COUTURE DESIGNS.

SUNBRELLA® - CUSHIONS

These fabrics receive a treatment with Cleangard®, which is formulated with nanomolecules of fluorine. This treatment safeguards them against the effects of saltwater, increases beading and gives the canvas unparalleled resistance against stains and grease. Cleangard® fabrics do not contain any substances considered to pose a risk for health, the skin or the environment. Most of these fabrics are recommended by the Skin Cancer Foundation and ensure maximum UV-ray protection. They bear the OEKO-TEX® label.

THE SWEET LIFE ON THE OPEN SEA

THE SWEET LIFE ON THE OPEN SEA

WOVEN FROM SOLUTION-DYED ACRYLIC,
THE LUXURIOUS SUNBRELLA® TERRY FABRIC
COMBINES UNIQUE TEXTURE, ELASTICITY
AND PERFORMANCE CHARACTERISTICS.

SUNBRELLA® TERRY

Sunbrella® Terry is a line catering to the specific needs of boat owners who must cover their leather or leatherette seats with cotton to protect their skin from the heat. Unlike most cotton fabrics – that do not withstand the wear and tear of repeated machine washing and extended exposure to UV rays very well – the new Sunbrella® Terry fabric guarantees long-lasting colourfastness and UV protection as well as effective resistance to mould and the rigours of a marine environment (salt water in particular) thanks to the solution-dyed fibres used in its unique weave. It is also more flexible, thicker and more comfortable than fabrics made mainly from cotton. It is available in nine solution-dyed colours.

THE GLOBAL BENCHMARK

Developed 50 years ago by Glen Raven USA, the textile brand Sunbrella® quickly became a standard-setter in the yachting world. These fabrics' quality and durability over time were appreciated and recognized by professionals around the world. The partnership between Dickson-Constant and the American group in 1998 has helped the Sunbrella® brand become the world's leading boat fabric and the quality benchmark for outdoor fabrics. Bavaria, Bella Boats, Beneteau, Couach Yacht, Dufour, Fairline, Jeanneau, Nimbus, Sunseeker, Wally, Windy and others: the biggest names in yachting choose Sunbrella® Marine fabrics for their one-of-a-kind quality which are not only attractive but also offer superior technical performance. Available in 110 countries around the world, the Sunbrella® collections have been brightening up exceptional boats and yachts for the past 50 years.

ULTRA RESISTANT

When choosing a quality fabric, it is important to recognise the raw material from which it derives. All Sunbrella® fabrics are made from solution dyed acrylic yarns. Contrary to other yarns, from which colour is obtained by a simple bath, Sunbrella solution dyed acrylic is made by adding the colour at the beginning of the production process, when the acrylic is still liquid. It is, therefore, coloured "to the heart" whereas some yarns are coloured on the surface only. Sunbrella solution dyed acrylic yarn is the guarantee of an exceptional durability of the colours over time.

WARRANTIES

Most Sunbrella® fabrics are backed with a 10 year limited warranty. The Sunbrella Plus, Supreme and Cushions fabrics are backed with a 5 year limited warranty (except Furling and Furling Adhesive). Dickson's Seaguard and Sunworker marine fabrics are backed with a 5 year limited warranty. Surlast is backed with a 3 year limited warranty. See general warranty conditions on www.dickson-constant.com and www.sunbrella.com

OËKO-TEX

This approval certifies that the acrylic fabrics with waterproofing treatment are non toxic. The tests prove the absence of smell, carcinogenic colourings, volatile components or even pesticides in the fabrics carrying this logo.

GREENGUARD INDOOR AIR QUALITY CERTIFIED

The Greenguard designation ensures that Sunbrella® fabrics are a low-emitting product and can be used indoors or in any application where enhanced air quality is preferred with the confidence that these fabrics will contribute to healthy indoor air.

QSE CERTIFICATIONS (Quality-Security-Environment)

Dickson Constant is ISO 9001 certified since June 2003, ISO 14001 certified since March 2012 and OHSAS 18001 certified since June 2012. These international certifications from the Bureau Veritas Certification show Dickson-Constants' desire to advance in the evolution of continuous progress and to respond even better to its customers requirements. It symbolises recognition and efficiency of its QSE service.

SUNBRELLA® FABRICS: THE ULTIMATE UV PROTECTION

Whether amateur or professional, sailors expect their marine fabrics to be very strong, but also to offer a high degree of solar protection. All Sunbrella® fabrics are now rated between UPF30+ and UPF50+: they offer an excellent protection against UV rays, protecting all skin types from the harmful effects of the sun.*
** except Furling, Furling Adhesive and Cushions.*

UPF 30+

This pictogram indicates that the fabric filters 95% of UVB rays.

UPF 50+

This pictogram indicates that the fabric filters 100% of UVB rays.

Since 2005, Sunbrella® marine fabrics benefit from the "Seal of Recommandation" of the Skin Cancer Foundation, for their "effective contribution to preventing skin damage caused by the sun". This international award is judged by an independent photobiology committee made up of experts on the effects of solar radiation and skin cancer. Difficult to obtain (involving intensive tests, strict criteria) it guarantees customers effective protection.
